

Summit Project Plan

Project Title

Leveraging Shared Collaborative Professional Learning Experiences in Order to Develop and Sustain a School-wide Professional Learning Community

District/ Organization

Oregon School District

Project Description

The challenge this project will address centers on leveraging adult learning that comes from collaborative professional learning experiences, including collaborative classroom visits (CCVs) and instructional rounds. The group will synthesize results from learning to develop and sustain a school-wide professional learning community.

The group will identify strategies and approaches likely to connect CCVs and instructional rounds as two distinct and collaborative professional learning experiences in order to use learning in service of students' achievement.
